42 CASK BREWING

30 BOTTLE AUTOMATIC WASHING SYSTEM – TOP LOADING

Low Emissions, Safe Operation, Highly Efficient, Fully Automated,
Compact Design, Economical

The bottle washer is compact fabricated in stainless steel.

Bottle trays are loaded from the top of the unit which has a clear, see through acrylic lid. Two plastic trays are included with the washer. Each tray will accommodate 30 bottles. Each tray has holes with a diameter to accommodate most beer and wine bottles.

The washer comes equipped with a circulating pump along with a 1 pump dispenser unit which is used for the addition of a chlorine based detergent. The control panel is mounted on the washer and all the internal fittings are connected. Total weight of the unit is approximately 150lbs.

To activate the washing cycle the top lid must be closed. The start button on the control panel is pushed and the cycle follows through to completion. The cleaning cycle is a hot water wash with a chlorine based detergent followed by a cold water rinse. After the initial cleaning cycle, a small amount of the original detergent is maintained in the cavity to work as a sanitizer in the cold water rinse cycle. There are 30 nozzles mounted in a PVC manifold that allows for the cleaning of the inside of each bottle.

The system is very user friendly. The complete cycle is under 4 minutes to wash and sanitize bottles. (We ensure our customers bottles are already clean prior to using the machine)

Requires hot and cold water at location as well as gravity drainage. Uses 115v 60hz single phase electrical supply

All copper piping has been replaced by us with stainless steel piping.

From Encasement Label... This is a safety label for our Coolers. It must be a
fresh and has only been stored cool. Encasement label is for
information only.

Some yeast strains such as Pilsener Lager, Call Ale, and
Brewmaster produce pressure over time when stored cool and if
periodic differences in how these strains manage their storage
carbohydrates (glycerol and polyols). We are continuing to investigate
this phenomenon.

Additional research has also shown that higher CO2 within our higher rising
strains also with this finding as well, we have also in this page. This will not
show any damage to the cells, and customers will see the same performance in
the puffy pouches.

ATTENTION
WYEAST LIQUID YEAST CUSTOMERS

To ensure we provide the freshest product available, once
current inventory is depleted, we will no longer stock Wyeast
styles in-house. We will begin ordering in September every 5-6
weeks from Wyeast. To receive notifications of upcoming
ordering deadlines, give your email address to the guys at the
cash or send us a note at guys@wyeast.com
requesting to be on the Special Order list for yeast and grains.
Encasement yeast will continue to be a regular stock item as
well as available to special order styles we don't stock.

52 The Ultimate Grain Mill

60lb capacity motorized electric \$2,000

Stainless construction, 60lb grain hopper with lid, fully adjustable hardened steel rollers, and explosion proof motor this is the top-of-the-line grain mill for homebrewers and a great choice for a nano brewery.

The all stainless hopper holds a sack of malted grain. The included stainless lid keeps dust down and keeps your hopper clean for your next batch. The mill body itself is also made from stainless steel while the 2" diameter rollers are made from hardened steel for longevity. The rollers adjust on both sides providing for a consistent, even gap the length of the rollers. The rollers are knurled in a pattern that we have found over the years to deliver a great crush and consistent feed.

Explosion proof motor, found on commercial mills, because grain dust can ignite if a regular electric motor was to emit a spark.

The stainless stand allows for a six gallon reception bucket to be slid under to collect cracked grain. Since grain dust is to be avoided in a brewery we make the bucket-to-stand fit perfectly tight to reduce dust in your brewery. A six gallon bucket will hold 25 pounds of grain.

Features

- 60 pound capacity stainless hopper with lid
- Stainless mill body
- 2" Fully Adjustable hardened steel rollers (Gap range of 0.011 - 0.093 inches)
- Stainless stand
- 1/3 hp explosion proof motor with on/off switch
- 110v Motor pulls 6.6 Amps
- 38"H x 27"L x 16"W
- 15 lbs per minute throughput
